Betsy –

Thank you so much for the follow-up call today. Your assistance is very much appreciated. We look forward to hearing from you and your TSCA counterparts.

I forgot to mention this – but, because this a recreational fishing area – we will likely need to address fish consumption issues.

Fondest regards,  
Connie

**Subject:** data request

Hello Connie,

Mike Johnson mentioned that you were looking for some data and I'm happy to help you out with that. While I work on getting the report together I thought these publications might help you and your team get started. I believe the publications cover almost all the available studies. In addition, everything we have is publicly available at the ECHA website located here:

<https://echa.europa.eu/web/guest/information-on-chemicals/registered-substances>

You'll need to enter the CAS number (62037-80-3) to get to the data. That website is pretty well organized, but please let me know if you run into any trouble finding things.

Regards,

Shawn

PS. I believe we met in person a couple of years ago. Mike invited me down to Raleigh to meet with some folks from DNER and I think you might have been there.
